3.2 Software

Required software is noted below, with an emphasis on the following terms:

- **Certified** - this release was tested specifically against this configuration.
- **Supported** - this release was not tested against this specific configuration, though it remains supported as differences between it and the certified software are minimal or not applicable to Everest.

	Certified	Supported
Operating System, Server	Windows Server 2016 with .NET Framework 4.5	Windows Server 2012 R2 with .NET Framework 4.5
Operating System, Workstation	Windows 10 Pro 64bit	Windows 10, all other 64-bit editions except Basic
Database	MS SQL Server 2016 SP1	MS SQL 2016/2017 standard or enterprise

3.3 Magento eCommerce Integration

Magento Connector is developed to support integration of Everest System with [Magento eCommerce](#) solution. The integration consists of Magento Connector and Magento add-on. The Connector must be installed on Everest Server along with Everest API. Magento extension must be deployed to the Magento system. Please review Everest eCommerce User Guide for more details. Integration supports the following versions of Magento:

- Magento Open Source 2.1.8
- Magento Open Source 2.2.3
- Magento Community Edition 1.9

Any questions that there may be for Everest should be directed to Customer support at <https://support.ignitetechnology.com>

4. How to Install or Upgrade to this Release

Everest Standard v8.0.22 can be obtained by creating a Zendesk ticket to either obtain the download credentials or arrange for our Managed Upgrade team to schedule an installation.

Installers were rewritten in v7.1.0 and a clean install is required.

The Everest release uses its own license keys, so appropriate licensing information should be obtained by creating a Zendesk incident ticket before the actual upgrade takes place.
