3.3 Magento eCommerce Integration

Magento Connector is developed to support integration of Everest System with Magento eCommerce solution. The integration consists of Magento Connector and Magento add-on. The Connector must be installed on Everest Server along with Everest API. Magento extension must be deployed to the Magento system. Please review Everest eCommerce User Guide for more details.Any questions that there may be for Everest should be directed to Customer support at https://support.ignitetech.com

4. How to Install or Upgrade to this Release

Latest version of Everest Standard can be obtained by creating a Zendesk ticket to either obtain the download credentials or arrange for our Managed Upgrade team to schedule an installation.

Installers were rewritten in v7.1.0 and a clean install is required.

The Everest release uses its own license keys, so appropriate licensing information should be obtained by creating a Zendesk incident ticket before the actual upgrade takes place.
