What's New in Surveyor 6.5.101?

Surveyor 6.5.101 is the latest version of Aptean's Verdiem Surveyor.

The 6.5.101 release includes some new features, and security improvements. In this version of release, the updated features and new functionality are as follows:

- Migration of UI from Adobe Flash to HTML5.
- Auto retire machines if licenses are reclaimed.
- Added security contexts to Analytics and Dashboard pages.
- Change in behavior of Surveyor Admin pages.
- Improved wake behavior to focus on wired wake.
- Surveyor Client support for Mac for versions 10.12.6 Sierra and 10.13.6 High Sierra.
- Display of custom error page when the user navigates to page that does not exist in the Verdiem application.

General Enhancements

The Surveyor 6.5.101 release includes the following enhancements:

Migration of UI from Adobe Flash to HTML 5.

Surveyor Server UI is migrated from Adobe Flash to HTML 5 to improve security.

Auto retire machines if licenses are reclaimed.

Once the licences are reclaimed for the machines, a provision is made to set the number of days after which to retire those machines automatically.

Added security contexts to Analytics and Dashboard pages.

A permission level is added for Analytics/ Dashboard pages so that only the users with the specified permission can access those pages.

Change in behavior of Surveyor Admin pages.

A default message " You do not have permission to view" is displayed to the users who does not have the specified permission to access Surveyor Admin pages

Improved wake behavior to focus on wired wake.

Surveyor wake functionality now focuses on wired wake as the primary method for reliable remote wake.

Surveyor Client support for Mac for versions 10.12.6 Sierra and 10.13.6 High Sierra.

Fixed issue where Mac OS blocked Surveyor client for 10.12 and newer OS's. Surveyor client now supports 10.12.6 (Sierra) and 10.13.6 (High Sierra)."

Display of custom error page when the user navigates to page that does not exist in the Verdiem application.

Changes are made to display the custom error page whenever the user navigates to page that does not exist in the Verdiem application.

Bug Fixes

Bug ID	Title
152318	Resolved the issue of occurrence of grammatical errors in Annual Reports.
161458	Resolved the issue in Installation guide to include Mac Client logs location.
161023	Resolved the issue in AdminCommand.exe which was failing to delete data by throwing the below exception: [System.Data.SqlClient.SqlException]. This was due to the conflict between the DELETE statement and the REFERENCE constraint "FK_ConnectedPrinter_Device_AssociatedComputerId".
163041	Resolved the issue of values not being rounded off to two digits in Baseline Energy Consumption section of Annual Reports.
